

## Inspection for **bedbugs**

Follow this advice  
to make the  
inspection easier:

- Provide access at the agreed time.
  - Follow the instructions on this sheet as well as verbal instructions from Nomor's pest-control technicians.
- Thank you for your help!

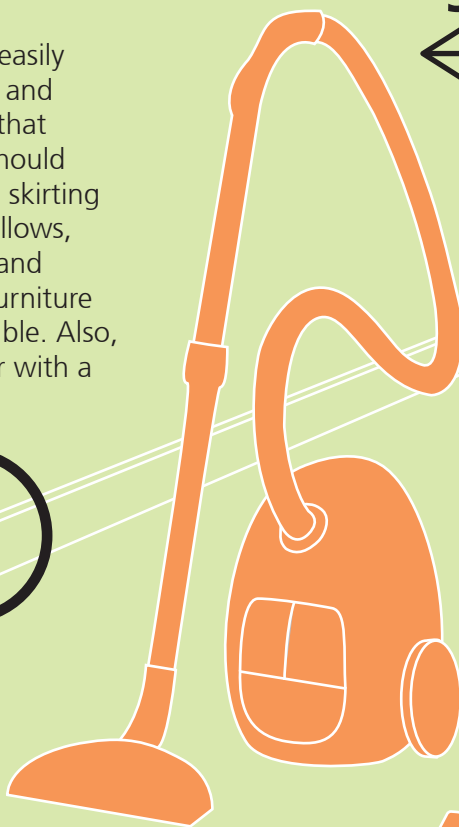

# Preparations in advance of an inspection for bedbugs

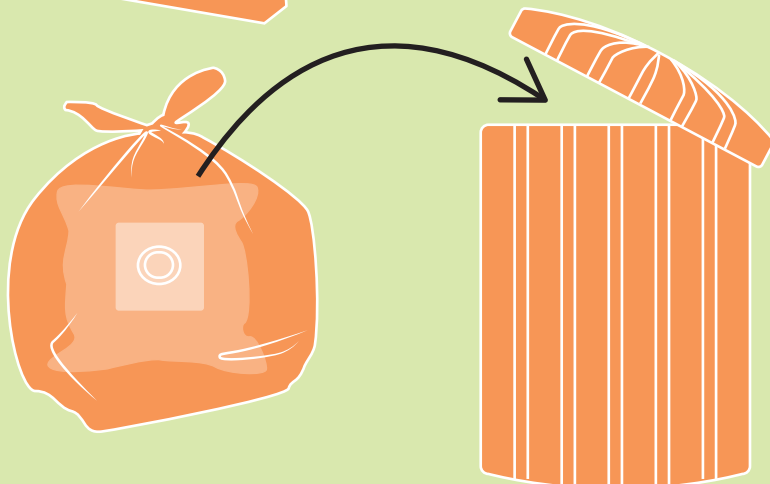

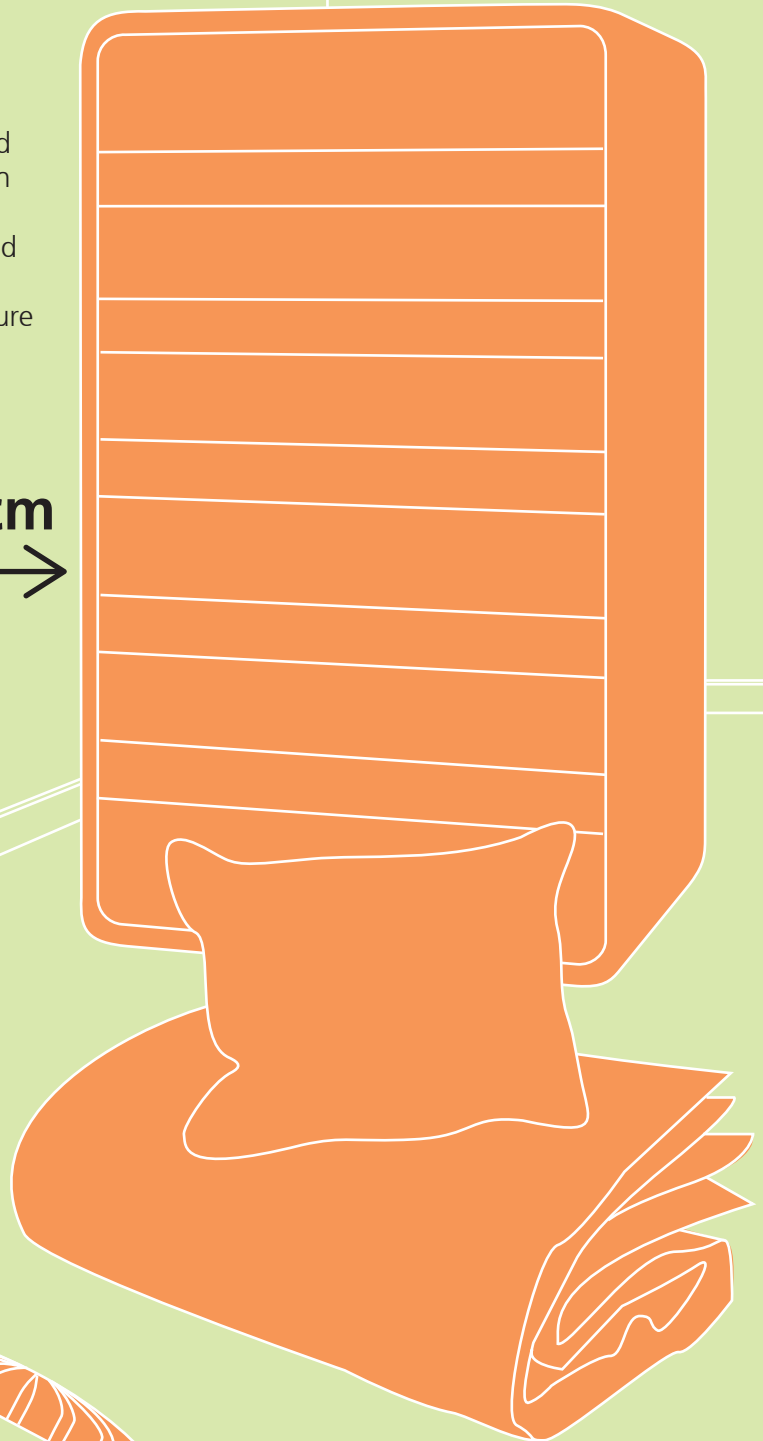

Nomor is coming to your home to carry out an inspection for bedbugs in your accommodation. If bedbugs are found, Nomor will assess which sanitisation method is required in order to eliminate the bedbugs. Before the inspection, you need to prepare your apartment according to the instructions on this sheet. If you have any questions or concerns, you are welcome to contact Nomor's customer services on 0771-122 300 or at kundtjanst@nomor.se.

Sofas and armchairs must be overturned and placed on their side or upside-down to allow the technicians access to the bottom of the furniture. Furniture placed against walls must be moved out half a metre from the wall. Don't move furniture away from the affected areas.

Bedbugs can easily hide in nooks and crannies. For that reason, you should vacuum clean skirting boards and pillows, etc. carefully and underneath furniture as far as possible. Also, wipe the floor with a damp cloth.
